TO M C Broussard, Ops Management, Bldg 080, X8517

FROM J K Hopkins, Environmental Restoration Program Division, Bldg 080, X8636

SUBJECT GRANULAR ACTIVATED CARBON REPORT - JKH-013-95

Attached for your review are two copies of the report prepared by Los Alamos National Laboratories assessing disposition of approximately 74 tons of granular activated carbon (GAC) presently stored at Rocky Flats Environmental Technology Site. The report contains a regulatory assessment of the status of the GAC and a conceptual design of Los Alamos' low temperature regeneration system that might be used to treat the GAC.

Los Alamos has completed this project and has been instructed to stop all work on this project.

Dave Struckman of LDR Waste Compliance has received a copy of this report.
